

# Module 4

## Don't be a victim!

In few words,

There is **NO** plug and play software can hack a credit card or FB accounts with few clicks, **ALL** of these programs are backdoors and Trojan horses which designed to **hack YOUR own** computer, account and credit card.

One of the most important countermeasures we explained earlier is do **NOT** any trust software and **never** blindly install it even if the AntiVirus **falsely** said it's harmless.

In the upcoming videos I will walk through the most common techniques to extract passwords out of the system, keep in mind that there are other techniques which based on local LAN network attacks.
